

Saul Sanchez

Fullstack Developer

About Me I enjoy learning something new, especially about technology. I am seeking a formal position where I can apply my knowledge and, at the same time, learn something new that allows me to grow professionally.

PROFESSIONAL EXPERIENCE

UNID, Saltillo

Fullstack Developer | January 2023 – April 2023

During this period, I led the development of a web application for attendance data optimization. I utilized the Ionic SDK along with the Angular framework to create an intuitive and appealing user interface. Additionally, I implemented the Strapi CMS to efficiently manage data storage and API creation.

Estampados Magna

IT trainee | September 2022 – February 2023

During this period, I mainly developed web applications (FRONT-END) using the Ionic SDK and the Angular framework and following the SCRUM methodology to track development progress. It's worth mentioning that I also used databases, as well as developing APIs, although this was not my primary focus.

Moldes de Saltillo

Trainee | February 2020 – March 2020

During the short period I was there due to the pandemic, most of the things I saw were related to my previous career. However, related to IT, I developed an inventory control system.

EDUCATION

Software Engineering and Computer Systems
